

# 00, SS Exit Buttons

## Push Button Exit Devices

001S

002S

SS

SSD

SFD

### Key Features

-  Green dome, stainless steel, or plastic exit buttons
-  Standard UK back-box format for simple installations
-  Green dome buttons provide a large target for less mobile users
-  Suitable for internal and regular traffic areas
-  Brushed stainless steel faceplates (SS models only)

### Product Description

These exit buttons offer sturdy door-release solutions for indoor environments. The 001S provides a durable surface-mount plastic design that fits the standard UK back-box format for quick installation, and the 002S offers a narrow shape, ideal for architrave mounting where space is limited. Both are suitable for low-to-medium traffic use. For a more robust alternative, the stainless steel models feature a high-impact green dome and "PRESS TO EXIT" text on the face, while also conforming to the standard UK back-box format to ensure straightforward installation.

## Product Specifications
